Profile

As a dedicated second year IT undergraduate seeking a internship to apply academic knowledge, gain hands-on experience, learning new technologies and contribute to organizational success. I am eager to collaborate, innovate and grow.

Education

BSc. Computer Science and Software Engineering   Expected graduation date:(2025)
University of Bedfordshire.

G.C.E Advance level Examination(2021)
- Physics: S
- Combined Mathematics: S

Skills

Languages
- JavaScript-intermediate
- Java-beginner

Frameworks
- Node.js-intermediate
- React-native- beginner
- React-intermediate
- Tailwindscss- beginner

Personal projects

User-Registration Web Application   GitHub-https://github.com/janitha-visna/MERN_app_userlogin.git

- Server-side: Accomplished secure user authentication by implementing JSON Web Tokens. Users have features such as verifying OTP and resetting passwords. Implemented middleware to verify user existence by username and hashes passwords for securely storing credentials in the database.
- Client-side: Safeguarded sensitive routes by implementing authorization middleware.
- Tech stack: Mongo db, React, Express, Node, tailwindcss

Weather Application Mobile Application   GitHub- https://github.com/janitha-visna/react-native-weatherapp.git

- Includes separate screens to display city, current weather, and upcoming weather information.
- Fetches and manages weather data using the user's current geographical location.
- Retrieves weather data from the OpenWeatherMap API.
- Tech stack-React Native, Expo Go
